

ZION LUTHERAN CHURCH

GRANT PARK, ILLINOIS

OPUS 2069

2 MANUALS, 26 RANKS

THE REUTER ORGAN COMPANY

Reuter Opus 2069 was originally built in 1985 for Highland Heights Christian Church in Wichita Falls, Texas. It was made available for sale when the church merged with two other congregations. Renovation of the instrument included seven ranks of new pipes and extensions for five existing ranks, greatly enhancing the tonal resources of this versatile, two-manual organ. The Great principal chorus is exposed and the rest of the Great pipework is in its own enclosure. New framing was designed for the existing expression louvers to improve their range of motion for maximum dynamic control.

Gallery prepared for new organ
