

Reuter Organ Available

Reuter Opus 1718 was built in 1970 for First Church of Christ, Scientist, in Bismarck, North Dakota. It was moved to Florida in 1998, where it has been used in both church and residential settings. This versatile instrument could again be installed in an organ chamber or be used very successfully, as shown, without an enclosure. It has a stopkey console with 3 thumb pistons affecting the Great and Pedal, and 3 thumb pistons affecting the Swell and Pedal. It is currently available in Florida and will be moved to the Reuter facility for disposition in March of 2010.
