Miami, Florida  
Built in 1972 by Reuter  
Two manuals, 11 ranks

This electro-pneumatic instrument was designed with the Principal and Mixture ranks exposed. The rest of the pipework is in a chamber with two shutter fronts, one equipped with individual shade actions. Although it has not received a recent Reuter site evaluation, photos indicate two changes have been made over the years—a wooden Sub-bass has been added (exposed on the gallery wall) and the original trumpet stop has been replaced. Additional photos are available for viewing on page 2 of this listing. The organ is being offered on consignment for $20,000. Please contact us for more information!
